

Flight Booking Engine

In airline environment, challenges for managing and extracting data to support an Online Air-Ticket Software are increasingly difficult as it needs to resolve customer centric requirements.

To resolve the issue, we provide a complete airline management and booking software designed to fulfill the need of our clients. With new and innovative technologies our system is made more consistent and organized to meet the business implementations.

Our cost effective and efficient system provides a comprehensive, low-cost solution for all aspects of Online Travel air-ticket booking, effectively integrating sales, flight details into one system.

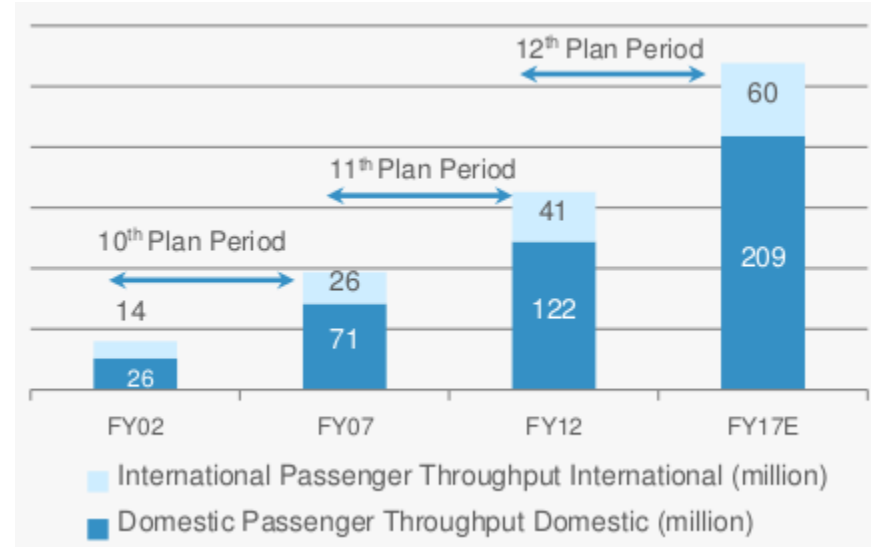

Industry Overview

Growth in passenger traffic is set to remain strong in future

Domestic passenger traffic expanded at a CAGR of 12.5 % over FY06–13; by FY17 domestic passenger traffic is expected to touch 209 million

International passenger traffic posted a CAGR of 9.8 % over FY06-13 and is set to touch 60 million by FY17.

Analyzing the current scenario, we see there is a massive growth in the aviation industry. As far as travel industry is considered, flight booking engine is an unavoidable part of web portal. Making it clear, no travel booking website serves its customers wholly without a flight booking engine.

Self Markup

All users can set a markup for themselves. So that whenever a user make a search in the system, then the fares are appeared with that Markup added on top of the air fare. This feature is to meet the operational functions in a travel agent level.

SELF MARKUP FOR DOMESTIC FLIGHT

SELF MARKUP FOR INTERNATIONAL FLIGHT

i

Here you can keep a markup to yourself for domestic flights. So whenever you make a search then these markup amount will be added on top of the air fare in the search result.

Airline	Fare Type	Markup % Or Amount
 Air India	<input type="radio"/> B <input checked="" type="radio"/> B+YQ <input type="radio"/> G <input type="radio"/> F	4.5 % <input type="text" value=".3"/> %
 Go Air	<input type="radio"/> B <input checked="" type="radio"/> B+YQ <input type="radio"/> G <input type="radio"/> F	10 % <input type="text" value="0"/> %
 Indian Airlines	<input checked="" type="radio"/> B <input type="radio"/> B+YQ <input type="radio"/> G <input type="radio"/> F	15 %
 Indigo	<input type="radio"/> B <input type="radio"/> B+YQ <input type="radio"/> G <input checked="" type="radio"/> F	100 Rs

UPDATE

Configure Self Markup for each Airlines.

Add Separate Markup for Domestic & International

Self Markup can also be configured on Gross Fare, Base Fare, Base Fare + YQ (Fuel Charges) or Flat Amount.

Instant Markup

A user can still add additional amount as instant mark up according to the demand of the ticket. This is a revenue generating process beneficial for the end travel agent.

The screenshot displays a travel booking interface with the following elements:

- Time Range:** A slider at the top set from 12:00 AM to 11:59 PM.
- Fare Type:** A section with three checked options: ☒ Refundable, ☒ Non Refundable, and ☒ Coupon Fare.
- Trip Duration:** A slider set from 1 h 30 m to 1 h 45 m.
- Markup Section (Circled in Red):**
 - Contains two input fields: one for a monetary value (with a ₹ symbol) and one for a percentage (%).
 - Includes **ADD** and **RESET** buttons.
 - Has a **Show Profit** checkbox below the inputs.

Simple XML API with SDK's

We understand the difficulties of a developer for integrating Flight Booking Service thus we made the entire process as much as simple with our easy SDK's, so you can relax while we do the complex coding.

Easy Amendments

We made the amendments much easier and integrated within the platform. You can place amendments requests from the online platform itself.

Integrate our flight booking Web Service API into your existing website

We provide web service API which allows you to access multiple GDS system.

You need not go through all the formalities and procedures that have to be done if you are directly trying to access the GDS.

We also brag about the high platform stability that we offer for the web service API.

We understand the difficulties of a developer for integrating Flight Booking Service thus we made the entire process as much as simple with our easy SDK's.

Fully Managed & Hosted Service

We know and understand technology better so you just focus only on your core business.

24 x 7 White Labeled Call Centre

You can rely on our **24 x 7** White labeled Call Centre Support for Cancellations & Amendments. Even if the flight had to be cancelled at 2 am, our white labeled call centre service ensures round the clock services for your customers .
